## Profile Summary

Computer Science graduate aspiring Data Analyst, with practical exposure to Python, SQL, Excel, and Power BI. Gained real-world experience through an internship, working on data cleaning, basic analysis, and dashboard preparation. Comfortable working with structured datasets and eager to apply analytical skills in a professional business setting.

## Technical Skills

- Python (Pandas, NumPy, Matplotlib)
- SQL (MySQL, Joins, CRUD)
- Exploratory Data Analysis (EDA)
- Excel (Pivot Tables, Dashboards)
- Power BI (DAX, Data Modeling)
- Data Cleaning & Visualization

## Education

**Bachelor of Science in Computer** *2025*
Shri Shivaji Vidya Prasarak Sanstha (SSVPS College), Dhule
- CGPA: 8.08

## Work Experience

**Data Analyst Intern ( NexGen Analytix )** *Aug 2025 - Dec 2025*
- Analyzed real-world data using Python, SQL, Excel, and Power BI.
- Performed data cleaning and EDA on structured datasets.
- Used SQL queries to extract and analyze database data.
- Created interactive dashboards in Power BI and Excel.
- Supported end-to-end data analysis and reporting.

## Projects

**User Management System (CRUD App)**
Technologies: Python, Streamlit, MySQL
- Built a full user management system with signup, login, update, and delete features.
- Implemented strong input validation, secure authentication, and real-time user feedback.
- Connected Streamlit UI with MySQL to perform complete CRUD operations for user accounts.

**Library Management System (Python + SQL)**
Technologies: Python, MySQL, SQL Queries
- Built a library system with tables for books, members, and issues.
- Implemented full CRUD operations for books and members using Python + SQL.
- Added issue/return logic with availability checks and status updates.
- Generated reports for borrowed, overdue, and most-borrowed books.

**Blinkit Sales Analytics Dashboard (Excel)**
Technologies: Excel, Pivot Tables, Charts
- Built an interactive Excel dashboard to analyze sales, outlet types, item categories, and ratings.
- Included filters for outlet size, location, and item type to generate dynamic insights.
- Visualized KPIs like total sales, avg sales, no. of items, outlet performance, and fat content distribution.

**Students Performance Analysis Dashboard (Power BI)**
Technologies: Power BI, DAX, Data Modeling
- Built an interactive Power BI dashboard to analyze student performance and placement eligibility.
- Created DAX metrics for pass/fail, department performance, and toppers.
- Used slicers for semester, department, and class to generate dynamic insights.

## Certificate

- Data Analytics & Data Science - Ethan’s Tech, Pune
